

WHAT'S A NAME WORTH?

L.I.To add numbers with up to 4 digits, using formal written methods of column addition

WHAT IS COLUMN ADDITION?

When writing down sums, separate the numbers into ones, tens, hundreds and thousands.

List the numbers in a column and always start adding with the ones first.

- Estimate first and check afterwards - it's a good idea to estimate a rough answer first and then check your actual answer.
- Order doesn't matter - remember that $345 + 129$ is the same as $129 + 345$.

Whose name was worth the most?

Whose name was worth the least?

What was the numerical difference between the name with the most and the name with the least?

If you added the worth of Prospero and Miranda what would the total be?
