

TASK

Think about all the maths you've done as part of this project; multiplication, division, fractions, time, measurement, coordinates, directions, addition, subtraction, perimeter and area, roman numerals!

Your task is to now create your own set of maths problems, maths challenge or maths game for your family or us at Primary Shakespeare Company to attempt or play!

It can be on any area of maths but **MUST** be inspired by *The Tempest*. Below are some images to help you. The rest is up to you....
